

KONICA MINOLTA

Giving Shape to Ideas

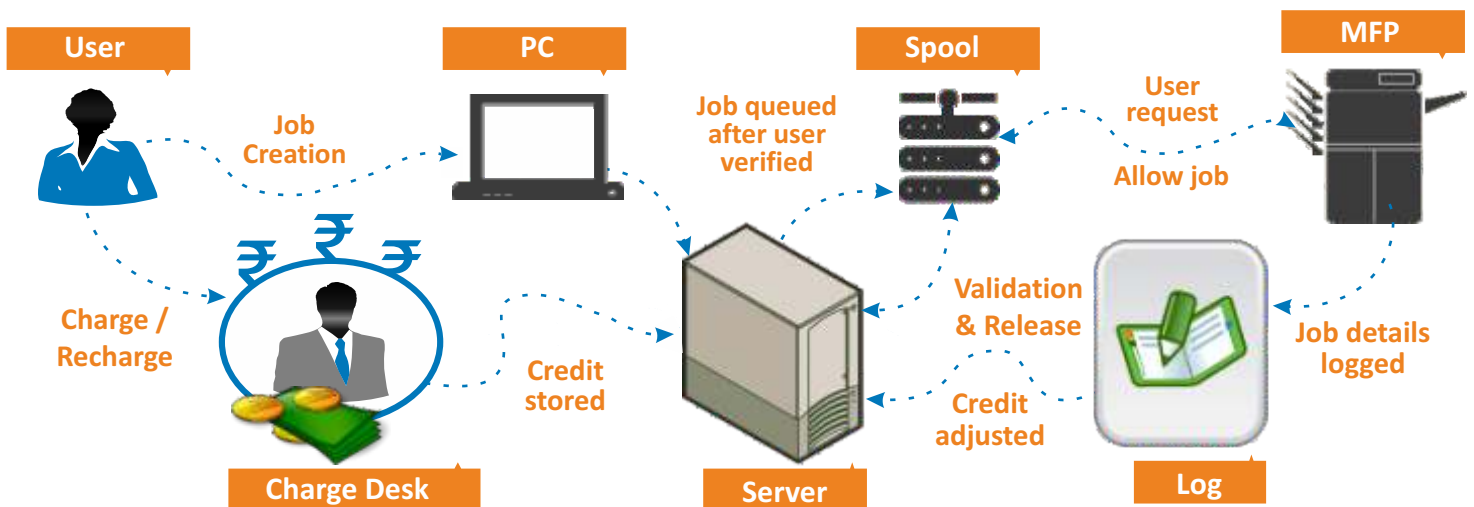

Education, Print Solution for Schools & Universities

All educational institutions are confronted by similar challenges in copying, printing and scanning. Besides school and university staff, also thousands of students need to work with printers. Schools and universities are thus seeking options such as user identification, disabling access to devices for unauthorized persons and/or charging fees for printing.

Our innovative output management solution offers a simple and quick response: an output management solution which solves all issues at once and brings even more unique functionalities. Users can deposit cash on their accounts and use the credit for printing, copying and/or scanning within the document environment of the university or school. It can be used also within established credit systems and students can have a single card for paying a food allowance, colleges or prints.

Education, Print Solution for Schools & Universities

Besides basic security of printing equipment and the possibility of charging fees, administrator can set rates for different operations and specific devices, groups or departments with our innovative output management solution. The administrators can set the limits for the staff efficiently so that they can print, copy and scan conveniently. Any other users (students) can instead recharge their credit at recharging points or payment gateways.

More reasons to have Konica Minolta Output Solution.

Security & access rights

- Access to the printer is blocked by the terminal until the user has logged on
- Authentication with a PIN, username and password or student card
- Definition of different rights for staff and students

Credit system

- Possibility of charging fees to students for printing services
- Credit recharging at charging points or with credit cards connected to the university credit systems, also used for other services

Recharging point with service

- The manual recharging point is connected to the local network via a computer and to our output management solution server via a special application and enables users to recharge their credit.

It is not only a sophisticated solution, tailor-made for schools and universities – it can offer even more useful functionalities to its users.

Secured print with the Follow-Me function

- users can pick up their job at any multifunctional device
- different rights can be defined for different users and roles

Operation monitoring and reporting

- accurate monitoring of all operations on multifunctional devices
- possibility of creating detailed user, department or project based reports
- automatic reporting to e-mails or folders
- variable export formats (html, xls, xml, csv)

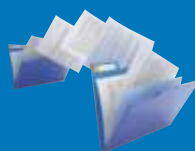

Scan Management

- one click scanning directly to user e-mails or folders
- definition of scanning processes with specific parameters for different documents

Shared print queues

- used by any amount of students in defined group (classroom)
- joint administration of all printed documents
- any of the groups can access print jobs and pick them up
